

**“I read Flying Adventures first,  
before any other magazines I receive.”**

**– Aviator Ed Martell**

*Hello, I'm Ed Martell. I'm an instrument rated pilot and owner of a Cherokee Six. I am a Financial Consultant with LPL Financial with a heavy business schedule helping people create and preserve wealth. This does not give me much time for aviation technical reading.*

*I use my airplane for business, and for my family to maximize our enjoyment of travel. That's why Flying Adventures is my magazine of choice. It's about the fun stuff. Many months I don't even read any other aviation magazines. Flying Adventures is a quick read of what's going on that makes our airplane travels more valuable. We love it!*
